PROFESSIONAL SUMMARY

Aspiring Software Engineer with 2 years of hands-on experience in enterprise applications, full-stack engineering, REST API design, and database optimization. Strong knowledge of software engineering practices, Agile methodologies, SDLC, Git, testing, deployment, and CI/CD. Committed to building scalable solutions, improving system performance, and contributing to high-quality engineering teams.

WORK EXPERIENCE

Associate Software Engineer | *Upali Group of Companies, Colombo, Sri Lanka* *November 2025 – Present*

- Developed and maintained a full-stack e-commerce platform, implementing 10+ core modules and integrating 2+ third-party services, while increasing monthly orders by 35% and reducing application latency by 25%.
- Engineered and maintained an HRIS module within an enterprise ERP system, implementing 7+ core modules including employee management, payroll, leave, loans, and asset management.
- Implemented a centralized security shield system to manage encryption keys, access tokens, and sensitive data across 5+ enterprise systems, supporting 1,000+ daily requests.
- Designed and integrated 40+ RESTful APIs, optimizing database queries and application workflows to reduce average response time by 25% and improve system scalability.
- Contributed across 100% of the SDLC, from requirements analysis and development through testing, deployment, and production support, collaborating with cross-functional teams using Git and Agile practices.

Software Engineer Intern | *Web C Lanka, Matugama, Sri Lanka* *July 2025 – October 2025*

- Developed and maintained 6+ responsive business websites and software systems, implementing client-specific features and database-driven functionality.
- Implemented RESTful APIs and backend modules, supporting authentication, data management, and third-party services.
- Managed end-to-end deployment and maintenance across cloud/hosting environments, including server configuration, troubleshooting, and ongoing client support.

Machine Learning Engineer Intern | *Sri Lanka Telecom PLC, Colombo, Sri Lanka* *February 2024 – August 2024*

- Trained and evaluated 3+ AI/ML models for the Park & Pay smart parking management system, including vehicle and number-plate detection.
- Contributed to Sinhala OCR development using computer vision and deep learning techniques for automated text recognition.
- Integrated AI models into full-stack applications, research-based development, Linux operations, and DigitalOcean deployment.

TECHNICAL SKILLS

Programming & Frameworks:
- Java, Python, PHP, JavaScript
- Laravel, React, FastAPI
- RESTful APIs, OOP, MVC

Databases & DevOps:
- MSQL, MongoDB
- Docker, Linux, DigitalOcean
- Git, GitHub, CI/CD

AI/ML & Tools:
- PyTorch, TensorFlow
- Machine Learning, Computer Vision
- Postman, Jupyter Notebook

EDUCATION

BSc (Hons) in Computing and Information Systems | Second Class Upper Division **GPA: 3.4 / 4.0**
Sabaragamuwa University of Sri Lanka *October 2020 – April 2025*

Diploma in Business English
IUHS Campus, Nugegoda, Sri Lanka *Jan 2022 – May 2020*

Advanced Level in Physical Sciences Stream
Mahinda Rajapaksha College, Homagama *2018*

RESEARCH

An Enhanced U-Net-Based Approach for Sinhala Document Layout Analysis: Proposed an enhanced U-Net with Vision Transformer blocks using 750 Sinhala document images across 14 categories, achieving 93.06% pixel accuracy and 77.32% F1-score.
