Sanduni Hulathdoowage

Software Engineer

Colombo, Sri Lanka | skdilukshi@gmail.com | +94 71 772 8723 | LinkedIn | Medium | GitHub | Google Scholar

Computing and Information Systems graduate with a solid foundation in machine learning and software engineering. Highly adaptable with diverse tools and technologies, combining technical expertise with strong problem-solving abilities to deliver innovative solutions.

WORK EXPERIENCE

Intern Machine Learning Engineer *February 2024 - August 2024*
Sri Lanka Telecom, Colombo, Sri Lanka *Certificate of Excellence*

Contributed to developing machine learning and deep learning models, worked on computer vision projects and full stack software development during undergraduate internship; received A+ grade for performance.

Intern Software Engineer *July 2025 – Present*
Web C Lanka, Matugama, Sri Lanka

Contributed to 7+ real-world software development projects involving full-stack web development, API integration, database management, and web hosting.

EDUCATION

BSc (Hons) in Computing and Information Systems **FGPA: 3.41/4.0**
Sabaragamuwa University of Sri Lanka October 2020 - April 2025

Diploma in Business English January 2022 – May 2022
IUHS Campus, Nugegoda

Advanced Level in Physical Sciences Stream 2018
Mahinda Rajapaksha College Homagama

RESEARCH

An Enhanced U-Net-Based Approach for Sinhala Document Layout Analysis

Developed an improved U-Net architecture with Vision Transformer blocks for Sinhala document layout analysis, enhancing OCR performance through element-wise OCR application. Research findings published and available on Google Scholar.

CERTIFICATIONS

- Machine Learning for All - University of London (Coursera)
- Computer Vision and Image Processing Essentials Badge - Coursera
- Introduction to Computer Vision and Image Processing - IBM (Coursera)
- Python for Beginners - University of Moratuwa

PROJECTS

AI based Criminals Identification System (Link)

Tools and Technologies - Python, OpenCV, ReactJS, MySQL, FastAPI, Figma

- Uses face recognition and three level authorization process and this system can identify Criminals, Store Criminal, Crime, Evidence and Victims Details and also Generate Reports.

Vehicle Parking Management System (Park N' Pay) (Link)

Tools and Technologies - DL, Computer Vision, Image Processing, OCR, YOLO, Laravel, Figma

- Group project under Sri Lanka Telecom; Built an intelligent parking solution with vehicle number plate detection using OCR and YOLO, enabling automated gate control, streamlined parking process, and integrated payment system.

ACME ERP System Development (Link)

Tools and Technologies – Laravel, Bootstrap, Hostinger

- Developed a responsive web-based ERP solution with modules for customer management, employee management, stock handling, billing, quotations, and role-based permissions.

TECHNICAL SKILLS

AI/ML:

- Deep Learning
- Predictive Modeling
- Computer Vision
- Algorithms
- Statistical Analysis

Languages & Frameworks:

- Python | PyTorch | C
- Java | ReactJS | JS
- PHP | Laravel
- FastAPI | HTML
- Tailwind | Bootstrap

Databases:

- MySQL | MongoDB

Other:

- MS PowerBI
- MS Excel | Git

SOFT SKILLS

- Communication
- Collaboration
- Leadership
- Critical Thinking
- Problem Solving
- Adaptability
- Flexibility

VOLUNTEERING

- IEEE ICARC Volunteer 2023

LANGUAGES

- English: Proficient
- Sinhala: Native
